

TOGETHER WE ARE

PIONEERING AVIATION AGAIN

Accelerating true zero emissions by an ecosystem approach

TOGETHER WE ARE

PIONEERS

Conscious Aerospace is a Tier 1 systems integrator company with a significant heritage having roots and connections in pioneering aviation for 100 years.

2028

OUR MISSION

In five years, we will have the first aircraft flying and engaged with new aircraft build concepts together with other aircraft manufacturers. We seek to realize that ambition by building a Dutch ecosystem outpacing the market with a credible green solution certified by 2028.

Integrated Dutch National Programme In a proven aviation Eco System

Triple Helix

Holland.

- Talent
- Design & Engineering
- Manufacturing
- MRO
- End of Life
- Logistics & Cargo
- Headquarters
- Civil Airport
- Military Air Base

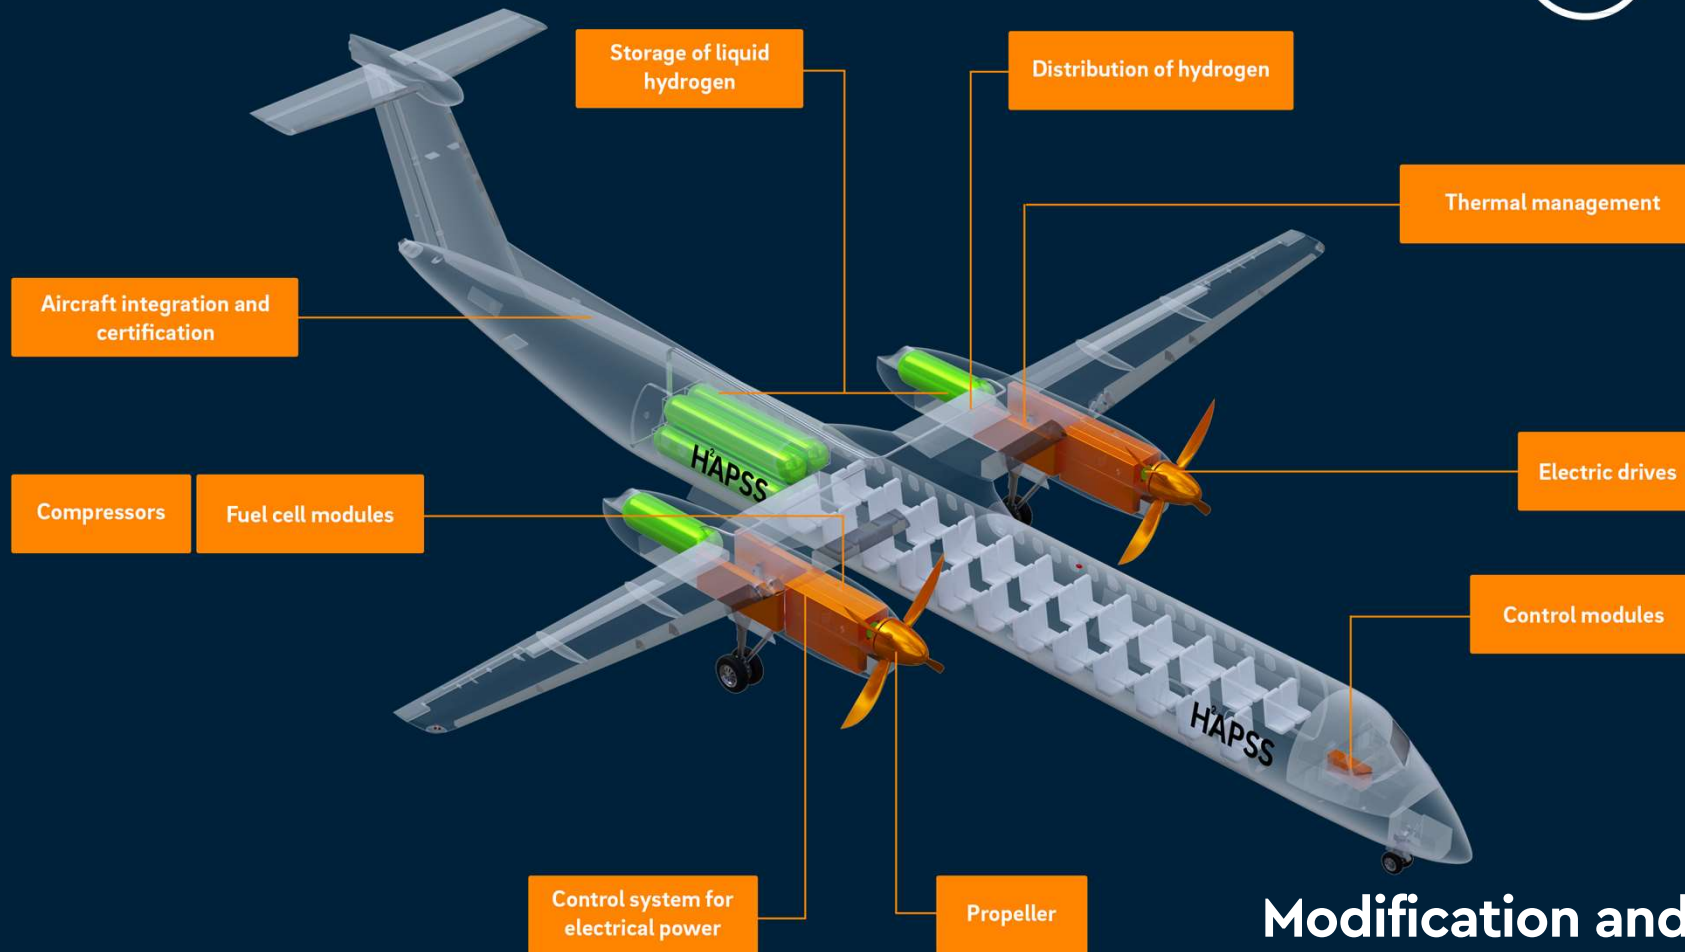

Proud to be Dutch

- All core technologies are from across The Netherlands, proven in Aviation, Automotive and Maritime
- R&D in collaboration with TU Delft and Royal NLR
- National Programme under the National Growth Funds "Luchvaart in Transitie" (Aviation in Transition)

HAPSS 2100 (2.1MW system)

**Modification and modification
kit solutions offered**

Realistic planning for a family products and applications

TECHNOLOGY APPLICATION & CERTIFICATION

Technology demonstration to 800kW hydrogen fuel cell powertrain

Technology application to 2.1MW hydrogen fuel cell application and certification for Dash 8-300 aircraft

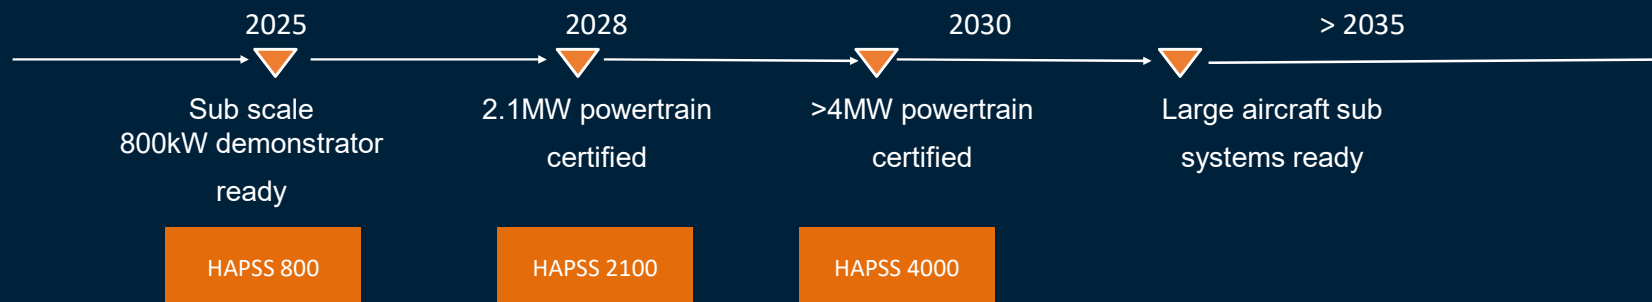

TECHNOLOGY SCALING FOR NEW AIRCRAFT

Technology application to Large civil aircraft sub systems

Technology application to Dash 8 Q 400 and ATR aircraft models development of 4MW hydrogen fuel cell powertrain for new sustainable turboprop aircraft.

We are Conscious!
